About the Class: NTC's NICET Level 1 & 2 Fire Alarm Training is intended for low voltage professional. This Course covers certification procedures and requirements, testing strategies, and NFPA and IBC code book. Students attending this course will develop a strong understanding of fire alarm systems, including the requirements of NFPA 72 (National Fire Alarm & Signaling Code), IBC (International Building Code), and NFPA 70 (National Electrical Code)

This practical applications based training course. The information covered in this training directly applies to everyday work in the industry. This course provides students with in depth information on code compliance and proven standards and practices for the industry. Throughout this course, there is an emphasis on safety, professionals ethics, and doing the right thing. Those who attend this training will be better prepared to meet the professional challenges of the low voltage industry.

- **Course Outline:**
- Certification procedures and requirements
- Testing strategies
- NFPA 72 (National Fire Alarm & Singling code)
- IBC (International Building Code)
- NFPA 70 (National Electric Code)
